```python
In [2]:  #91. program to print value of age
         age = 25
         print(age)
```

25

```python
In [4]:  # 92 program to print value of number-1
         number=20
         print("the value of number= ",number,"and  (number-1)= ",number-1)
```

the value of number= 20 and (number-1)= 19

```python
In [5]:  #94 program for addition of two variables a&b
         a=23
         b=20
         print("the sum of ",a,"and",b,"is=",a+b )
```

the sum of 23 and 20 is= 43

```python
In [6]:  #95 program for area of rectangle
         lenght=45
         width=76
         print("the area of rectangle with lenght = ",lenght,"and width = ",width,"is =
```

the area of rectangle with lenght = 45 and width = 76 is = 3420

```python
In [ ]:  #96 program for area of circle
         radious= 8.9
         pi=3.14
         area=pi*radious*radious
         print(area)
```

248.71940000000004

```python
In [9]:  #97 program on string
         a="Learnig "
         b="is fun!"
         print(a+b)
```

Learnig is fun!
